K839

Rail Hanger
Finished Size 100mm x 210mm

Guidelines

Thank you for downloading your **Folder King** template. This template will help you to set up your artwork correctly for your chosen product.

This document can be opened and edited in Adobe Illustrator CS4 and above. Alternatively, these templates can be placed into Adobe InDesign or Quark XPress documents.

This document is set up to the exact flat size of your chosen product. Pink lines show cuts. Please do not alter the document size or the colour and position of the lines in this template.

Please provide a minimum of 3mm bleed beyond the template cutter line on all outer edges.

When creating your artwork, we also recommend a 'quiet area' where no text is placed closer than 5mm to the inside edges of the template. This ensures that no text is at risk of being lost when your product is trimmed.

For further information and instructions with helpful guides and how-to videos, please refer to our artwork guidlines at: **www.folderking.co.uk/artwork-guide**
